

METHOD AND SYSTEM FOR NOTIFYING MAIL USERS OF MAIL PIECE CONTAMINATION

Abstract of Disclosure

A method and system for notifying users of a mail system that a mail piece has been quarantined is provided. A plurality of incoming mail mailboxes each include a sampler to sample air from a letter that is tested using a first sensor. Source information corresponding to hazard flagged mail pieces and other quarantined mail is utilized to notify the affected users of the mail system.

Patent for Method and System for Notifying Mail Users of Mail Piece Contamination
